EXPERIENCE

Snapp! Box - Software Engineer

Tehran - Iran

NOV 2022 - Present

Snappbox is an on-demand urban delivery platform in Iran, offering businesses access to the country's largest delivery fleet, revolutionizing last-mile delivery with smart technology and operational excellence.

Adanic - Back End Developer

Tehran - Iran

AUG 2022 - OCT 2022

Adanic, founded in 2014, offers specialized banking solutions in Iran, with key infrastructure products and user-friendly applications. Serving notable clients like Ayandeh Bank and Parsian Bank, Adanic has quickly established itself as a go-to for technical financial expertise.

Novin Kish ISC - Software Developer

Tehran - Iran

NOV 2021 - JUL 2022

ISC, established in December 1993, is the premier banking system provider for Iran's commercial banks and financial institutions. Headquartered in Tehran, ISC is the largest electronic banking operation in the Middle East, acclaimed for top rankings in technology and service categories.

EDUCATION

Amirkabir University of Technology

BSC Computer Engineering
2020-2024

PROJECTS

ACPC Web-Site Back End

As the technical head of ACPC, I fully developed the back end of ACPC web site. In this project I worked with spring boot, docker and some other technologies.

Blue Anonymous Bot

A clone of random persian chat bot.

Blue Words

A word list generator that can be used for brute force attacks
